Schneckenhaus

Step 1: Spirale

Step 2: zweite Spirale

Step 3: Z Index anpassen

Erste Probleme

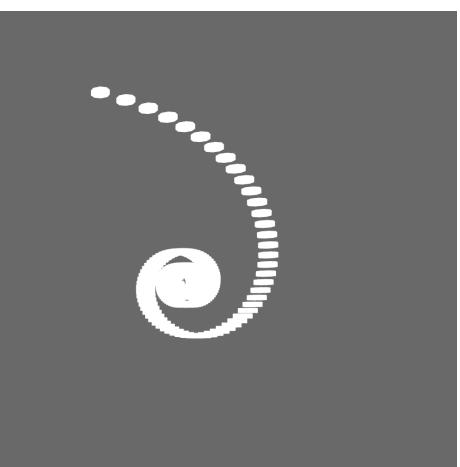

- Verbinden der zwei Spiralen?
- Füllen der Form?

Neuer Ansatz

- Spirale erzeugen
- Punkte aus Spirale auslesen
- An Stelle der Punkte Kreise zeichnen

Neuer Ansatz Test

Gelernt

ofPolyline -> ofPath

```
ofPolyline randomPoly;
  ofPath path;
  for (size_t i = 1; i < randomPoly.size(); ++i) {
     path.lineTo(randomPoly[int(i)].x, randomPoly[int(i)].y);
}</pre>
```

ofPoint als ofVec3f

ofPoint

This class is a typedef (something similar to an alias) to ofVec3f, so it can be used the same way as that class.
